Speaker recognition is the identification of a person from characteristics of voices. It is used to answer the question "Who is speaking?" The term voice recognition can refer to speaker recognition or speech recognition. Speaker verification (also called speaker authentication) contrasts with identification, and speaker recognition differs from speaker diarisation (recognizing when the same ...

## Openness in Adoption: Building Relationships Between

In legal terminology, the situation where the liabilities of a person or firm exceed its assets. In practice, however, insolvency is the situation where an entity cannot raise enough cash to meet its obligations, or to pay debts as they become due for payment. Properly called technical insolvency, it may occur even when the value of an entity's total assets exceeds its total liabilities.
