According to Robin A. Williams and David Edge (1996), "Central to social shaping of technology (SST) is the concept that there are choices (though not necessarily conscious choices) inherent in both the design of individual artifacts and systems, and in the direction or trajectory of innovation programs.". If technology does not emerge from the unfolding of a predetermined logic or a single ...

Making Blended Finance Work for the Sustainable

A shaper is a type of machine tool that uses linear relative motion between the workpiece and a single-point cutting tool to machine a linear toolpath. Its cut is analogous to that of a lathe, except that it is (archetypally) linear instead of helical.. A wood shaper is a similar woodworking tool, typically with a powered rotating cutting head and manually fed workpiece, usually known simply ...

Short Row Shaping. As I mentioned in my previous post, short-row shaping is a way of working partial rows in order to create extra fabric. It can be used to shape one or both edges of a piece, or a section in the middle of the piece – actually, you can work it anywhere within a piece that needs extra fabric.

No surprise here—managers exercise great influence on employee attitudes and behavior. They play an essential role in creating, nurturing, and sustaining an ethical culture and an ethical workforce. Regulatory agencies acknowledge that fact, and they will scrutinize management practices, from time to time. For example, the U.S. Department of Justice and U.S. Securities and Exchange...
