Conclusions. The RI findings on far field exposure to RFR are consistent with and reinforce the results of the NTP study on near field exposure, as both reported an increase in the incidence of tumors of the brain and heart in RFR-exposed Sprague-Dawley rats.

Report of final results regarding brain and heart tumors

Seahorse (also written sea-horse and sea horse) is the name given to 45 species of small marine fish in the genus Hippocampus. "Hippocampus" comes from the Ancient Greek hippokampos (????????? hippókampos), itself from hippos (????? híppos) meaning "horse" and kampos (????? kámpos) meaning "sea monster". Having a head and neck suggestive of a horse, seahorses also ...

PURPOSE To develop a scoring method for brain observations in patients with X-linked adrenoleukodystrophy. METHODS One hundred seventy-five brain MR scans in 83 male subjects less than 20 years of age with proved biochemical defects were reviewed. A severity score (0 to 34), based on a point system derived from location and extent of disease and the presence of focal and/or global atrophy, was ...
